Cyro-Weld™ 5303FT

UV/Visible Light/LED Curable Flexible Liquid Pressure Sensitive Adhesive

PRODUCT DESCRIPTION

Incure Cyro-Weld™ 5303FT UV/Visible light curing pressure-sensitive fluorescing adhesive is widely used in the manufacture of gel-pads for silicon wafers, laminates and pressure-sensitive labels and high performance adhesive tapes used in the medical industry. Medium-high in viscosity, it cures completely in seconds with a high-tack feel on the surface, it provides shear strength of up to 3kg. Incure 5303FT exhibits low water absorption and shrinkage properties. Cures in seconds, it is transparent, fluorescing under blacklight to aid inspection. Product is 100% solids and contains no volatiles.

Note: This product has been thoroughly tested to cure with F200P™ UV Flood Lamp. Intensity wavelengths (shaded) are crucial for curing this product. All measurements are made with EIT UV PowerPuck II. If you are unable to fully cure this product for some reasons, pls email us for assistance with your curing information.

SHELF-LIFE, STORAGE, USE AND HANDLING OF THIS PRODUCT

Shelf-Life of this unopened product is a minimum of ONE (1) year from date of manufacture. Avoid direct exposure of bottle to visible light at all times. Containers should remained covered when not in use. Product should be stored in a dark cool place of 10°C to 32°C. Transfer of product into other packages void all warranties. Users should ensure all bonding surfaces are free of grease, mold release, or any contaminants, as bonding performance will be compromised. All tests for cured bonds should be carried out at ambient temperature. For safe handling of this product, please read Material Safety Data-sheet (MSDS) prior to use. Organic solvents, such as IPA, may be used to wipe away uncured material from surfaces.

EtO and GAMMA STERILIZATION

All Incure medical products are formulated to subject to standard sterilization methods, such as EtO and Gamma Radiation of 25 to 50 kGravs (cumulative). Enhanced moisture and thermal resistance of this product show excellent adhesion and bonding strength after one cycle of steam auto-clave test. Depending on bond design and structure of the application, users should test specific assemblies after subjecting them to sterilisation. Consult Incure Support Team for assistance, if your devices are subjected to more than one sterilisation cycles.
