# Optik™ 7731

# UV/Visible Light/LED Curable High Strength Metal-Glass Optical Bonder

#### PRODUCT DESCRIPTION

Incure Optik™ 7731 UV/Visible Light/LED curable adhesive is a clear, low viscosity, high performance, ultra-high bond strength optical bonder. It is widely used in many different applications in electronics, optical, glass and metal fixture and furniture industries. Product cures ultra-fast in seconds with low energy intensity LED lamps. Couple with enhanced moisture and temperature resistance properties, Incure 7731 exhibits very low shrinkage, low water absorption and ultra-low CTE capability. It is 100% solids, contains no volatiles and it is ideal for product requiring thermal cycling.

Note: This product has been thoroughly tested to cure with F200P™ UV Flood Lamp. Intensity wavelengths (shaded) are crucial for curing this product. All measurements are made with EIT UV PowerPuck II. If you are unable to fully cure this product for some reasons, pls email us for assistance with your curing information.

## SHELF-LIFE, STORAGE, USE AND HANDLING OF THIS PRODUCT

Shelf-Life of this unopened product is a minimum of ONE (1) year from date of manufacture. Avoid direct exposure of bottle to visible light at all times. Containers should remained covered when not in use. Product should be stored in a dark cool place of 10°C to 32°C. Transfer of product into other packages void all warranties. Users should ensure all bonding surfaces are free of grease, mold release, or any contaminants, as bonding performance will be compromised. All tests for cured bonds should be carried out at ambient temperature. For safe handling of this product, please read Material Safety Data-sheet (MSDS) prior to use. Organic solvents, such as IPA, may be used to wipe away uncured material from surfaces.

### EtO and GAMMA STERILIZATION (Not Applicable for this Product)

All Incure medical products are formulated to subject to standard sterilization methods, such as EtO and Gamma Radiation of 25 to 50 kGrays (cumulative). Enhanced moisture and thermal resistance of this product show excellent adhesion and bonding strength after one cycle of steam auto-clave test. Depending on bond design and structure of the application, users should test specific assemblies after subjecting them to sterilisation. Consult Incure Support Team for assistance, if your devices are subjected to more than one sterilisation cycles.
